Raghuraman Kadambi is a graduate mechanical engineer and has *20 years of experience* with varied industries; one thing being common – **business systems**. He started his career as *sales engineer* in 1996. It was this job that generated his interest in *business processes*. About three years later, he switched his career to Information Technology.

In information technology domain he has worked in *Project Life cycle, Customer Support Life cycle* and *Product Development Life cycle*. He has played diverse roles; all critical and core to projects including *business systems implementation, systems migration, sales, presales, business consulting, systems analysis & systems design, software development, product development, project and program management, end user training, project management training, systems testing, operation automation* and *system documentation*.

He has enjoyed every bit of his work. He has always *looked for a learning opportunity in everything he does* and which is why he *has had a wonderful journey so far!*

Currently, he is a practicing project manager and consults in project management across industries. In the past, he has been successful in managing On-Site / Off-Shore relationships and has a 100% success rate in handling these projects.

He enjoys teaching and his specialities in teaching are *Project Management* and *Progress OpenEdge Development*.
